- Extremely Durable
- Extra UV
- Superior Air Release qualities
- Impact Resistant
- Excellent Color Stability- non yellowing stability in years
- Easy to use
- High-Gloss Waterproof Finish
- Perfect surface flatness and Wonderful strenght

HOW TO HAVE A GOOD APPLICATION ?

1- PREP :

Plse read the user guide carefully and prepare your resin kit and clean dry container for mix .

2- ALWAYS MIX HOW MUCH DO YOU NEED :

To determine how much you'll need, use our resin mix information at www.arcepoxy.com. With gloves on, pour precisely equal amounts (by volume) of room temperature resin and hardener into a mixing container.

3- MIX RESIN AND HARDENER

- Always mix resin and hardener in a clean dry container. **Measure 1 parts A VOLUME (RESIN) and 1 part B VOLUME (HARDENER)**
- Mix 3-8 minutes (its changable to users) and you must sure to mix homogeneous.

4- USE TO SEURFACE :

Pour and spread as you see fit. ARC ArtResin is self-leveling. You can coat the sides with gloved hands or a disposable brush, or just let it dome neatly on top.

5- FINISH YOUR PROJECT

Bubbles will begin to rise to the surface. We recommend using our heat gun -Torch to pop bubbles for a flawless finish. Pick out any hairs or dust particles with a toothpick.

6- CURE TIME :

Cover your piece to protect it from dust and let it sit overnight. In about 24 hours, your piece will be hard to the touch. After 48 hours it will be fully cured.

TECHNICAL INFORMATIONS

MIX RATION (VOLUME)	1:1 (RESIN AND HARDENER)
IDEAL APPLICATION TEMPARATURE	ROOM TEMPATURE (20-25 °C)
WORKING TIME	20-40 MINUTES AT 24 °C
CURING TIMES	24 HR HARD CURE---48 HR FRULL CURE
STORE	KEEP IN ROOM TEMPERATURE CONDITION
SHELF LIFE	2 YEAR UNOPENED- 1 YEAR OPENED
